It's a whole new web call accounting Revolution!

Revolution Web Call Accounting is a browser based application that helps business track and manage analog and IP communications. Revolution Web Call Accounting can help maximize efficiency and productivity, track and analyze network performance and forecast, monitor and allocate expenses. You can perform administrator tasks, assign user privileges and create management reports from anywhere.

Leveraging the strengths of its Developer Partners and their Compatible Products, the Developer Program has become a key contributor in the success of Nortel by broadening its reach and responsiveness in meeting the needs of its channels and customers. Each Nortel Compatible Product has met established requirements for integration, functionality and stability, further reducing total cost of ownership.

Revolution Web Call Accounting is a powerful 100% browser based call accounting software for the small and medium business user. It has a built-in webserver, SQL database engine and automated task scheduler.

The built-in web server provides full browser implementation without the need for complex industry web servers. The internal web server can run on any available port. The software collection module can run as a service and eliminates the need for a buffer box.

Works with all call detail formats

Data collection can be received from many sources including tcp, serial and file. The library of drivers includes all call detail formats for your BCM or Norstar telephony platform. In fact, if we do not have a driver for your data format we can easily create one using our scripting language.

Comprehensive reporting tools

Whether you want detail, summary and graph reports, Revolution Web Call Accounting can provide them without any special training.

Revolution Web Call Accounting can monitor incoming and outgoing calls in real time. Alarms and reports can be scheduled for emergency 911 notification, toll fraud or misuse reporting. A built-in contacts database can be used to quickly identify all calls made to / from a particular contact and tagged as personal or business related.

Intuitive and comprehensive reporting solution

Revolution Web Call Accounting installs quickly and easily. The integrated installation wizard asks a few basic questions then proceeds to configure the

application in seconds. For the novice user, Revolution Web Call Accounting comes with informative online help that can be accessed at the click of a button, providing easy-to-understand examples about the current task

Can be deployed in any industry segment

Revolution Web Call Accounting is an industrial strength, fast and reliable call accounting software package. Revolution Web Call Accounting can be deployed in virtually any enterprise including hospitality, retail, government agencies, brokers, professional firms, banks, hospitals and universities. Telecom managers find it increasingly difficult to allocate telecom costs to various departments or cost centers or individuals. This solution will pinpoint charges, highlight misuse and increase productivity
